

GOTTFRIED SCHULTZ GROUP, DÜSSELDORF / GERMANY – Car dealership

SYSTEM H-FR

WATERTEC® WT 20

REQUIREMENTS:

- Little possibility for large-scale construction, therefore free-standing sludge traps, oil separator and treatment plant in above-ground design
- The client requires resource conservation of fresh water and a high recycling rate

SOLUTION:

- " Custom-designed concept for waste water purification and treatment
- " Sludge traps, extraction basin free-standing filterless separation system in stainless steel design as well as a wash water treatment system
- multi-stage WATERTEC WT 20 filtration system (20,000 l/h)

STATEMENT BY GOTTFRIED SCHULTZ:

„With similar solution concepts, close to 20 Gottfried Schultz locations have now been equipped with INOWA waste water technology
