

# MAHAG, MUNICH / GERMANY

## Car dealership - multiple locations

SYSTEM H-FR

WATERTEC® WT 6

### REQUIREMENTS:

- Little possibility for large-scale construction because most of the dealerships are located in inner city areas
- Custom-designed concept for waste water purification and treatment required
- Mainly free-standing system located above ground within existing indoor spaces
- The client requires resource conservation and a high recycling rate

### SOLUTION

- INOWA basin systems were implemented at multiple locations in Munich
- Special solutions with free-standing vessels and treatment systems in basements were also used
- This avoided the need for time-consuming and expensive excavation and sewer construction work
- free-standing solutions for wash water treatment in stainless steel and plastic
- multi-stage fine filtration using WATERTEC treatment system WT 6 (6,000 l/h), WT3K (3,000 l/h) and WT 3 (3,000 l/h)

### STATEMENT BY, MAHAG:

„Since 1998, numerous MAHAG locations have been installed with systems from INOWA and solutions for new construction projects have been implemented
