SYSTEM H-FR

WATERTEC® WT 6

REQUIREMENTS:

- Few options for structural measures due to the inner-city location
- Custom-designed concept for waste water purification and treatment required
- Free-standing system located above ground within the workshop
- Divided into two non-adjacent floors (basement and 3rd floor)
- 20m height difference
- Conservation of resources and high recycling rate

SOLUTION:

- Supply 2 gantry car washes on the 3rd floor from wash water treatment system WATERTEC WT 6 (6,000 l/h)
- 2 free-standing high-performance separators SYSTEM H-FR (according to Swiss standard SN EN 858) for drainage of workshops and wash bays in the basement
- Free-standing sludge traps and extraction tanks in the basement

rd Floor

Basement
