E ONS RANGE SWITZERLAND
Washing for military equipment

HIGH-CAPACITY SEPARATOR

REQUIREMENTS:

- Upgrading an existing petroleum separator in a concrete basin
- elatively small access openings in the existing plant
- Reliability must be guaranteed in the most adverse conditions (mud, dirt, oil)
- Filterless system, easy maintenance

SOLUTION:

- Installation of an NS100 100 l/s custom-made filterless high-performance separator with automatic oil extraction device in a separate oil tank according to the latest technical standards, in compliance with Swiss regulations
