# GENERAL BECK BARRACKS, SONTHOFEN / GERMANY – Municipal sector

SYSTEM H-C2

PEHD-INLINER

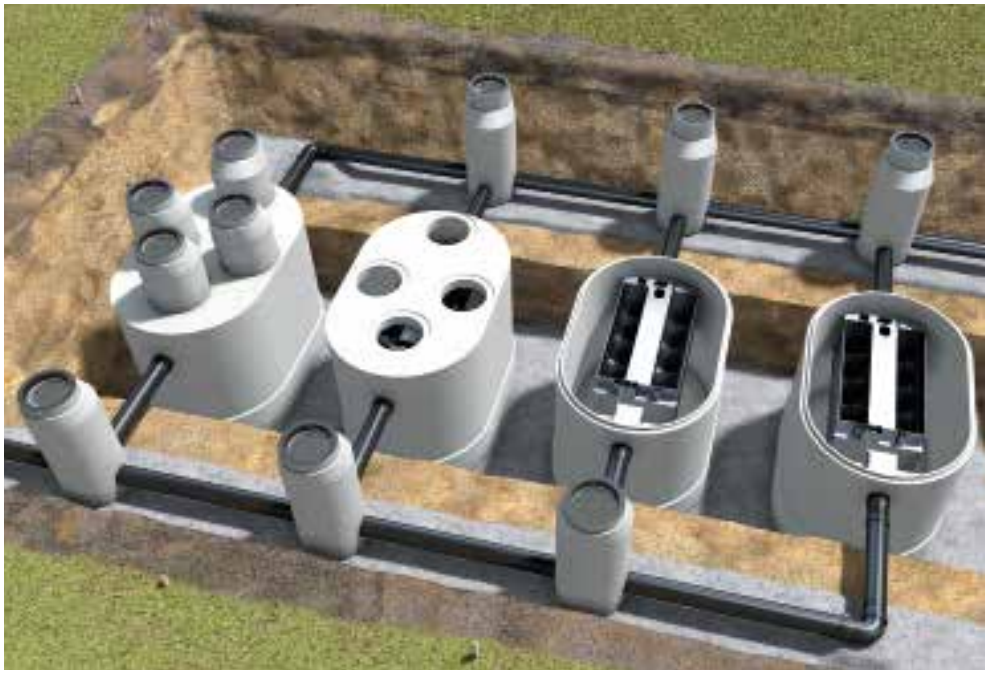

## REQUIREMENTS:

- System for the drainage of a 5,000m² area where cleaning of military vehicles and decontamination exercises are carried out
- The location of the separators is dictated by other underground objects
- Reliability must be guaranteed in the most adverse conditions (mud, dirt, oil)
- Filterless system, easy maintenance, as high accumulation of oil, sludge and other contaminated substances is expected

## SOLUTION:

**NS 160 l/sec separator system consisting of**

- high-performance SYSTEM H-C2 NS 40 l/sec separators with PEHD inliner
- Maintenance-free due to filterless technology
- No renovation of the inner coating expected thanks to the PEHD inliner
